## Finally...

An easy and effective way to clean, protect & polish all clear or colored plastics!

## What is VuPlex?

First developed for use in the aviation industry, VuPlex® is the most simple and effective product to clean, polish and remove static on clear and coloured plastics. It's ability to clean the surface safely, while polishing in an action that takes only seconds is unique. VuPlex® seals the porous surface of plastic, extending the life span with a micro layer of protection. VuPlex® makes fine scratches less visible, leaving a surface with a crystal gloss all in one easy step, making VuPlex® easier and clearly the most effective maintenance solution for plastic surfaces.

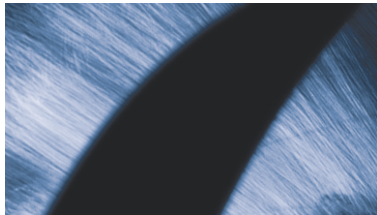

## How VuPlex Works...

1

VuPlex® effortlessly removes stains that other cleaners won't touch, by applying a micro-thin layer of protectant, sealing the porous surface.

2

The polished finish makes the plastic resistant to debris, oil, scratches and yellowing. It also makes fine scratches less visible.

3

Water and other contaminants are repelled from the surface giving added protection. The residual film is also safe on food preparation surfaces.

4

The anti-static properties help to repel dust and abrasive materials, adding to the preservation of the surface.

## What can I use VuPlex on?

There are almost limitless applications for VuPlex®. Although VuPlex® is designed for a specific purpose (clear and coloured plastics), VuPlex® can be used on polished metals, painted and glass surfaces.

### BOATS

Acrylic and Polycarbonate  
Windscreens

Windows  
Spas  
Storm Windows

## Conventional Plastic Cleaners

Previously, plastic cleaning products have proven less than satisfactory. Existing cleaners are often messy, ineffective and/or difficult to use.

Many products actually contain chemicals or abrasives that can damage the surface of plastic.

## Trying is believing

VuPlex® works on countless plastic products, preventing premature wear while helping them to look their best

VuPlex® produces shiny, cleaner, more lustrous finish with no smears or smudges. It makes color plastic vibrant, clear plastic virtually transparent and plastic paint gleaming like new.

## Try it for yourself

Use VuPlex® when you're looking for the most effective cleaner, protectant & polish for any kind of plastic.

## How to Use...

For best result spray on lightly. Wipe off and buff with a soft clean cloth. If surface is new, use microfiber cloth. If surface is old, use cotton cloth. THAT'S IT! (Do Not Use Paper Towels)
